

## Biographical Sketch

### **ELISABETTA IACOPI, MD**

Diabetologist, Endocrinologist, Diabetic Foot Care Specialist.  
Diabetic Foot Section – Pisa University Hospital.

### **Education/Training**

**2010** Graduation in Medicine and Surgery with the vote of 110/110 cum Laude at Metabolic Department of Pisa University Hospital. Dissertation titled “Conservative surgery of diabetic foot: retrospective analysis of ten years of activity at Diabetology Department of Pisa University Hospital”.

**2017** Specialization in Endocrinology and Diabetology with the vote of 110/110 cum Laude at Diabetic foot Section and Metabolic Department of Pisa University Hospital. Dissertation titled “Diagnostic therapeutic pathway in Diabetic Foot Syndrome patients managed in a tertiary referral clinical centre: critical revision of 5 years of activity.”

### **Contribution to science**

Until now I published more than 50 articles, all of them on Diabetic Foot and I have also co-authored 6 chapters book on Diabetic Foot. I was the first author in 20 of the article (39%). Many of these articles have been published in the context of collaborative International projects.

My h-index is 6 (ISI Web of Science – Researcher ID I-7073-2019)

I am a reviewer for International Journal of Lower Extremity Wounds, Endocrinology Diabetes and Metabolism Case Reports, Clinical Case reports and Annals of Translational Medicine.

### **Membership**

1. Italian Society of Diabetes (SID) since 2012
2. Association of Italian Diabetologist Physicians (AMD) since 2014
3. Diabetes Foot Study Group of the EASD (DFSG) since 2017
4. International Diabetes Foot Care Group (IDFCG) since 2014
5. European Wound Management Association (EWMA) since 2018
6. Association of Diabetic Foot Surgeons (ADFS) since 2018
7. Prevention of the First Ulcer Project, Diabetic Foot Study Group (DFSG) under European Association for the Study of Diabetes (EASD), since 2018

### **Clinical trials**

Since 2010 to now I have participated, as Sub-Investigator, in many International clinical trials, all of them originating scientific publications on diabetic foot care.
